

tesseract_collision
::ConvexDecomposition

```
classDiagram
    class ConvexDecomposition {
        <<abstract>>
    }
    class ConvexDecompositionHACD {
    }
    ConvexDecompositionHACD --|> ConvexDecomposition
```

The diagram illustrates a class hierarchy. At the top is a white box representing the base class 'tesseract_collision::ConvexDecomposition'. Below it is a grey box representing the derived class 'tesseract_collision::ConvexDecompositionHACD'. A blue arrow points from the HACD box up to the ConvexDecomposition box, indicating that HACD inherits from ConvexDecomposition.
